

FIREHOUSE WORLD 2010 VIRTUAL BOOTHS

5 Star Life / AFBA - AFBA Established in February 1947 AFBA has over 350,000 members and associate members with over \$37 billion of Life insurance in force. We have expanded our eligibility to include Emergency Service Providers, Law Enforcement, Firefighters, and Emergency Medical Service Providers; and all their families. Paul Bartlett Regional Director

Booth # 941

AFBA Background & Eligibility Established in February 1947 Our mission at AFBA is to provide financial solutions that meet the needs of our members and their families at every stage of their lives. AFBA is constantly improving its life insurance products and member benefits; additionally, through its related enterprises, we offer unique and competitive products to help you meet your financial goals. AFBA has over 350,000 members and associate members with over \$37 billion of insurance in force. We have expanded our eligibility to include all families of the uniformed military services; all Department of Defense and Federal Government employees; all contractors in support of the above; all state, municipal and local government employees to include Emergency Service Providers (Law Enforcement, Firefighters, and Emergency Medical Service Providers); and all their families. You are eligible to enroll for a maximum of \$500,000 through age 64 provided you are a United States citizen. Your spouse may also apply for coverage up to \$500,000 through age 64. Comtech Communications - ComTech Communications takes the lead in fire station alerting. Whether retrofitting an existing department or designing a new station, ComTech provides unique flexibility, affordability, and field proven systems.

Booth # 741

ComTech fire station alerting systems are designed to reduce your department's response time. Every moment is critical when lives are on the line, and ComTech has designed its systems to help you shave off crucial seconds of response time, successfully perform critical emergency services, and never, ever miss calls. No matter if you are retrofitting an existing station or designing a new department wide alerting system, ComTech offers unique flexibility because ComTech systems are non-proprietary. This allows designers to create integrated, hi-tech solutions using the best of all possible technologies. Departments, like you have realized savings of up to 40% over comparable proprietary equipment and benefited from the ComTech System.

Cosmas USA - Cosmas®, the next generation of fire boots, direct from Italy. NFPA-certified structural and wildland firefighting boots, with a reputation as the best fitting, highest quality, high-performance brand of personal protective footwear available.

Booth # 956

Cosmas® is located in Montebelluna, Italy, a world-renowned center for technical footwear research, development and manufacturing. Since 1971, Cosmas® has been developing and manufacturing high performance footwear to meet the needs of mountaineering professionals, firefighters, emergency services personnel, and military special forces. At Cosmas®, our philosophy is simple: Draw on the input and experience of professional firefighters, the latest innovative materials and technologies, and our hand-crafted footwear heritage to develop the best fitting, highest-quality, high-performance personal protective footwear available. The development of materials, processes, and technologies plays a vital role in the design and manufacturing of our line of Cosmas® firefighting boots. From our patent-pending MIDSOLEARMOR™, to our proprietary outsole compound, to our extraordinary heel hold system, it is the incorporation of new materials, processes, and technologies that gives us the edge. In fact, technology development is the cornerstone of our parent company, Novation S.p.A., an Italian original equipment manufacturer specializing in mold design and fabrication, injection molding, composite component design and fabrication, and manufacturing of components and finished goods for the sporting goods, footwear, and automotive industries. Through its association with Novation S.p.A, Cosmas® is able to tap into materials, processes, and technologies that are unavailable to most footwear manufacturers. Cosmas®, the next generation of fire boots, direct from Italy. NFPA-certified structural and wildland firefighting boots, with a reputation as the best fitting, highest quality, high-performance brand of personal protective footwear available.

New Product: COSMAS VULCAN

The Cosmas® Vulcan is a 14-inch structural firefighting boot with a leather + schoeller® fabric upper with KermeI® for resistance to heat, flame, chemicals, and abrasion. It features a MIDSOLEARMOR® composite puncture plate/ladder shank/midsole, providing full puncture resistance coverage and thermal insulation for the bottom of the foot. This Cosmas®-exclusive, patent-pending construction is stiff and supportive in the heel and arch, yet flexible in the forefoot, allowing your foot to flex naturally. Other features include ANKLEARMOR™ contoured ankle guards, and a proprietary high traction, vulcanized rubber outsole equipped with HEELROLL™ and TOESPRING™ to promote a natural walking

motion. The Vulcan is the lightest true 14" boot on the market.

EyeKnow Narcotic Tracking Systems - EYE KNOW NARCOTIC TRACKING SYSTEM The need for efficient life safety & EMS service cannot be overstated! The EyeKnow Narcotic Tracking System will ensure narcotic security, accountability, responsibility and integrity. Accountability will reduce the risks associated with litigation due to inadequate auditing procedures.

Booth # 509

Founded in 2002, Protelligent, Inc., a California corporation, is a full service IT engineering and development firm that specializes in best-of-breed technologies" and has collaborated with EMS experts, to address a major concern which is a comprehensive technological system that accurately addresses the internal structure of narcotic tracking within a challenging and unique work environment of EMS and Fire Departments. The EyeKnow tracking program provides accountability and security for controlled narcotics which would enable Emergency Medical Service Departments to provide better service to the community with prompt, skillful and cost effective service, while abiding by all State and Federal laws covering the disbursement, administration and storage of controlled narcotics are followed. The need for efficient paramedic service cannot be overstated. With growing communities, life safety services can rapidly overwhelm organizations. Fire Departments and local pharmacies working together can make a difference in the community. Protelligent committed to community service. We have a clear vision and passion for delivering outstanding customer service. The solution is to implement a program to track controlled narcotics. The EyeKnow Inventory Tracking System, coupled with internal policy and procedure on the procurement, distribution, usage and inventory reporting of controlled substances will significantly increase accountability, responsibility and security of all controlled drugs while reducing risk associated with litigation due to inadequate auditing procedures. The system can be broken into three (3) components: Distribution, Daily Auditing and Reporting. Distribution – The pharmacy distributing the controlled drug to the unit will deposit the narcotic into tamper-evident bags marked with unique bar-code stickers which are applied to tracking sheets and logged into the EyeKnow Web-Based Software program. Daily Auditing - Designated paramedics perform daily auditing using the EyeKnow bar-code scanner, which is linked to the station computer, sending scans to the EyeKnow Tracking Inventory System. Reporting – Once the data is received by EyeKnow, managers can view the status of all tracked items in real time. The EyeKnow application is web-based and can be securely accessed from any computer that has internet access. FireStationLogos.com - Designing fire logos for almost 15 years gives us experience in knowing how to help Firefighter-Rescue-EMS friends get what they want from their custom-designed identity. Build camaraderie through custom designed FIRE/EMS logos for work-shirts, uniforms, off-duty t-shirts, caps, patches, apparatus decals, embroidery, etc. Let us serve you! Thanks.

Booth # 1542

Firefighters-Rescue-EMS:

We have enjoyed talking with our clients, helping them with ideas on how to build camaraderie through custom designed station logos for their uniforms/t-shirts/patches/decals, etc.

When thinking about custom designing your identity, you can start with the following questions:

- * What makes your station, district, department unique?
- * What is the history of your station?
- * Is your station located anywhere near a landmark or place of significance?
- * What's special about the neighborhood, city, or even street you are located on?
- * What do you enjoy most about your fire house?

Even if you don't know where to get started - we can help. Thank you for your service. Let us serve you.

New Product: Heart Start FRx Defibrillator (AED)

The HeartStart FRx offers on-demand CPR Coaching to help the stressed user recall their training. Calm, clear voice instructions are precisely timed to the responder's actions, guiding the responder every step of the way. At just 3.5 pounds, it is among the smallest and lightest defibrillators. • Effective. The electric medicine delivered by the HeartStart FRx is the world leader in automated external defibrillators (AEDs), with more than 40 studies on its effectiveness. Philips' high-current/low energy therapy ensures a potent defibrillation dose, while at the same time, minimizing side effects that are harmful to a fragile heart. So the HeartStart FRx can deliver its most powerful therapy from the very first shock. There's no need to hold back.

INTEC Video Systems, Inc. - Since 1978, Intec Video Systems Inc. has supplied the fire and rescue industry with the most durable and water proof rear-vision camera systems available to prevent backing accidents. Our Video Sentinel surveillance system integrates a color zoom and thermal imaging camera to provide accurate information a for scene commander.

Booth # 2001

Since 1978, Intec Video Systems, Inc. has pioneered the rear-vision camera industry setting the standard for others to follow. With the widest field of view available, in both color and black & white versions, operators can now eliminate blind spots around any rescue vehicle. For over 30 years, Intec Video Systems has pioneered the rear vision safety camera industry. Intec provides reliable visibility solutions through its Car Vision systems reducing the risk of blind spot collisions. Tested to withstand all vehicle generated and environmental conditions, Intec's safety camera systems are the highest performing and longest lasting systems available. Intec also provides a scene surveillance system, Video Sentinel, which incorporates both color zoom and thermal imaging cameras with options for a 360 degree tilt and a wireless version. This expandable, modular unit can be mounted on a mast or aerial platform, and viewed on the ground at the control panel or from a command center up to 2 miles away. INTEC provides a scene surveillance system, Video Sentinel, which incorporates both color zoom and thermal imaging cameras with options for a 360 degree tilt and a wireless version. Multitek North America - The Hose Station HS-600 is a hose washing station designed for fire departments, wild land firefighters and nuclear facilities to wash hoses faster and safer.

Booth # 1148

New Product: Hose Station

Multitek is introducing a new product to the firefighting world. The Hose Station HS600 is a hose washing station designed for fire departments to wash hoses faster which saves significant time. The HS600 is housed in an aluminum diamond plate cabinet made in America. The cabinet has large openings allowing easy access to the patented conveyor washing system, enabling up to 6 in diameter hose and couplings to pass. This machine washes 50 feet of hose in about three to five minutes, compared to the 20 to 30 minutes when done by hand. The HS 600 has 8 stainless steel spray nozzles that spray 360 degrees around the hose and a variable self feeding hose driver that allows total control by only one user. The Hose Station HS600 is going to save you time, allowing you after a fire to get back your bunk faster and or your family, while eliminating any more fatigue on the body. The HS600 has many options available some of them being ; a hose pressure tester, air knives for drying, hose winder for before or after washing, trailer tow package and a pre-soak tank.

New Edge Technology Solutions, Inc. - First responder vehicle GPS tracking and personnel GPS tracking / man-down device transmitting and receiving over UHF frequencies.

Booth # 1356

New Product: PLD1000 - Personal Locator Device 1000

The PLD 1000 is a scaled-down self contained version of the VLD 1000 designed as a Personal Locator GPS transponder modem transceiver that can be worn by personnel for tracking, with individual duress alarm and man-down support options. Plans are in motion to include health state monitoring. GPS tracking and location devices have been around for several years, but unlike these older technologies, our products have been designed as a stand-alone system with no monthly charges and doesn't utilize cell phone tower backbones or infra-structures. Designed around the latest precision GPS tracking and pinpoint location technology and secure data transmission needs, our products are top on the line. Now being testing and utilized by several national and local government agencies, as well as several international users, our products are providing them with reliability, speed, and pinpoint accuracy they demand and depend on.

R-O-M Corporation - R-O-M Roll-up doors allow quicker access to equipment without obstructions associated with swing�out doors. Only manufacturer offering � Patented power doors & locks � Patented door-ajar switch � Perfect-match wet-paint. R-O-M also sells Hose Bed Covers, Cargo Trays, LED Compartment Lighting, and DuroLumen Interior LED Lighting.

Booth # 1202

Since 1947 R-O-M Corporation specializes in engineering, manufacturing and distributing custom products to meet exact customer specifications and is a recognized innovator in the fire service industry. R-O-M manufactures quality products such as, Roll-up Shutter doors; Horizontal Shutters, Hose Bed Covers, Extreme Cargo Trays, LED Compartment Lighting and DuroLumen Interior LED Lighting.

**New Product: Extreme Cargo Tray Series**

When you spec an emergency vehicle, you call on R•O•M as your single-source compartment access solution provider. From industry-leading R•O•M Roll-Up Doors to LED Lighting, Hose Bed Covers to Perfect Match Wet Paint, R•O•M leads the way. Our latest innovation is the R•O•M Extreme Cargo Tray Series. Working closely with engineers from leading emergency vehicle OEMs, our world-class engineering team has custom-designed a tray to meet the exact needs of the fire service. A pull handle the full width of the tray ensures rapid access to stored equipment. A durable aluminum construction with corrosion-resistant, zinc-plated hardware is built to meet tough environments. And the R•O•M Extreme Cargo Tray is lighter than competing systems, allowing you to store more equipment or achieve fuel savings. **EFFICIENT ACCESS** • Unique Design and Construction - Provides quick and efficient access to stored equipment. • Full-width Handle - Handle along the entire width of the tray ensures single-handed access. • Smooth Operation - Non-binding tray includes heavy-duty, v-groove, stainless steel sealed bearings. **RUGGED CONSTRUCTION** • High Quality Materials - Built for longevity from heavy-duty 6061-T6 aluminum alloy and corrosion-resistant, zinc-plated hardware. • Light Weight - Weighs less than competing trays, offering fuel savings or additional equipment storage. • Minimal Maintenance - Simply keep the track clean and lubricated for life-of-the-truck longevity. **EASY INSTALLATION** • Mounting Options – External and internal mounting foot options that allow multiple mounting solutions. • New or Retrofit - Accommodates roll-up or swing doors in all installations. **MODELS** • 100% Straight Pullout Model • 90% Tilt Pullout Model • 70% Straight Pullout Model • 70% Dual Directional Pullout Model

Wag'n Enterprises, LLC - Your Official Pet Oxygen Mask Provider. Established in 2008 the Wag'N O2 Fur Life Program provides First Responders Across the US & Canada various pet oxygen mask acquisition options to help save the lives of pets involved in residential fires while on

the scene!

Booth # 810

Why should first responders carry pet oxygen masks? The real question is why shouldn't they? For a long time firefighters who tried to save pets on the scene of a residential fire had to use human non-re-breather masks (NRB) if inclined to provide on scene 100% oxygen. These masks are designed for human use not animal use. Oxygen was wasted since the masks didn't properly fit the pet's nose.

Benefits Include:

- Pet Oxygen Masks are designed specifically for use on pets, reducing cross contamination with human apparel (oxygen tubing specific to their use)
- Fits all oxygen tanks
- Reduces waste of oxygen
- Allows for inhalation and exhalation during delivery
- Can be used on breathing and non breathing animals
- Fits pediatric and adult Ambu bags for rescue breathing
- Can be used on more than cats & dogs
- Simple & easy to use
- Lightweight
- Easy to maintain
- Very small price tag to save a life (\$65 per kit)

As pets have entered our homes and curled their way into our hearts and bedrooms, giving first responders the right tools to make a difference during a rescue is Wag'N Common Sense!

Wag'N gives you the best value for purchase. Wag On By Booth #810 for show specials.

SEMPER WAG'N!

New Product: Wag'N Pet Oxygen Mask Kits

You respond to residential fires. All people are rescued and transported to hospitals by EMS. Pets are extricated. They seem to have suffered from smoke inhalation. How can you help them on the scene? Use Pet Oxygen Masks! You already carry the O2. Simply hook up the mask to your tank, adjust the regulator and help pets on the scene.

These cone shaped masks come in 3 sizes for various types and animal sizes. You can help dogs, cats, ferrets, bunnies, birds, reptiles, wolves, alpacas, hamsters and many more furry buddies.

Each Kit Includes:

- * 3 Different masks - 1 small, 1 medium and 1 large
- * 3 oxygen tubes - 1 for each individual mask (22 mm)
- * 1 Wag'N O2 Fur Life Carry Bag (can also be used for kitty restraint)
- * 1 Wag'N CPR For Cats & Dogs Magnet
- * 1 Laminated Instruction + ABCs For Cats & Dogs Diagram
- * 1 Wag'N Leash (for restraint & emergency muzzle)
- * 1 "Pet Oxygen Masks On Board" decal for display at the station
- * 1 "Pet Oxygen Masks On Board" decal per kit for display on emergency vehicles

WEST-MARK Fire Apparatus - West-Mark originated in 1967 to fill a need for manufacturing and repair of transportation equipment. West diversified its engineering capabilities and began to produce fire apparatus and transport tanks of all types by 1973. Today West-Mark can accommodate any business needs with the highest quality product and service in the Western US.

Booth # 533

West-Mark originated in Modest, Ca in 1967 to fill a need for the manufacturing and repair of tank transportation equipment for the dairy industry. Our increased volume, due to customized quality equipment and dedication to customer service, necessitated that we move to an expanded facility in Ceres, CA. Having established our reputation for excellent workmanship, West-Mark diversified its engineering capabilities and began to produce fire apparatus and transport tanks of all types by 1973. West-Mark has since opened a new manufacturing facility in Atwater, CA, a service center in Bakerfield, CA and another service center in Fairbanks, Alaska. Today West-Mark can accommodate any business needs with the most extensive

facilities of its kind in the Western United States. West-Mark will continue to expand by providing the same customized quality equipment and personal service that has won the respect and trust of our customers.
